

Message to staff

Securex, our External Service for Prevention and Protection, supports our company through health monitoring, risk management and psychosocial interventions.

Your safety

Your safety is a priority. If you notice a hazardous situation, a potential accident risk, or if you have suggestions to improve safety, **please contact our internal prevention advisor:**

Your health at work

If you face any health problems **related to the exercise of your job** (back pain, skin problems after the use of certain cleaning products, etc.), you can appeal to your **occupational physician** or **medical assistant(s)**:

Your psychosocial wellbeing

Our company tolerates **no acts of inappropriate behaviour at work at all**, irrespective if these acts are committed by colleagues, supervisors or third parties.

If you believe to have suffered any damage caused by psychosocial risks, please feel free to contact, in all confidence:

- the trusted person(s) within your company (if present):

- the prevention advisor psychosocial aspects of Securex:
